

Snaply – simply an app.....

✖ Our app, Snaply, lets you easily browse all the free items people are giving away or selling cheaply nearby. We've recently launched on the App Store and have integrated with the local Freegle (UK version of Freecycle) group in Edinburgh to allow Snaply users to browse and post to Freegle.

People are giving away TVs, sofas, gym stuff, and loads more. Getting these second hand is a massive money saver and re-using stuff in this way also keeps up to 200kg of rubbish per British household out of landfill each year.

The app makes it super easy to list something, either for sale, or to give away. The whole process takes less than ten seconds and is free. Right now we are just on iPhone but the Android version is coming soon. ✖
