Light and Shadow: Architecture On Screen. Architecture and design play an important part in our everyday lives, both consciously and subconsciously shaping, physically and visually, the towns and cities we live in and the everyday

☒ objects we use. Films have often used architecture as an integral character, setting the atmosphere and forming an essential backdrop to plot. As Part of the **2016 Year of Innovation, Architecture and Design**, the **Edinburgh Architectural Association** in conjunction with **Filmhouse** have brought together a series of feature films and accompanying Scottish shorts that explore the role of architecture and design within film and beyond.

Today's opening film is ***Blade Runner: The Final Cut* (15)**. Adapted from **Philip K Dick's** novel *Do Androids Dream*

☒ *of Electric Sheep?*, **Ridley Scott's** iconic dystopian

classic is unquestionably one of the greatest sci-fi films ever made. The year is 2019, and LA is playing unwitting host to a group of escaped synthetic humans called replicants. Bred for slavery on off-world colonies and outlawed on earth, these illegal immigrants are

hunted by Blade Runners, and Rick Deckard (**Harrison Ford**) has the task of 'retiring' them. What follows is a visually stunning and thematically dense *future noir* that delves deep into what it means to be human. 5.45pm, Saturday 14th May, [Filmhouse](#), Lothian Road.
