

Wester Hailes Community Trust – a progress report

Wester Hailes Community Trust was set up to support development in the area which is truly community led.

They set out in 2016 with two goals in mind – one to establish a locally controlled community fund and delivering projects that meet its stated charitable purposes.

There is funding available and the deadline for the second round is 1 November 2017.

The application guidelines are [here](#) and an application for the new tier of funding can be found [here](#).

So how have they done?

The Trust and the Digital Sentinel produced this video report to explain all the work they have done during the first year.
