

New homes for Craigmillar

3D view of the development

A Glasgow-based construction firm is currently building 111 new affordable homes as part of the first phase of the Craigmillar Town Centre Masterplan.

The work is being done on behalf of Dunedin Canmore and is scheduled to be finished in summer 2018,.

A total of 54 new homes are for social rent and a further 57 for mid-market rent.

Callum Murray for builders CCG said: "These new homes will provide high quality, affordable housing for the community of Craigmillar.

"This development is also creating valued work placements and apprenticeships with four trade apprentices currently based on site as well as donating money and resources to local initiatives such as the Craigmillar Literacy Trust, Grass Roots Clothing and the Castlebrae School Memorial Garden."
