

# Jackie to share expertise at Masterclass

Jackie Partridge the co-founder of Dermal Clinic in Morningside will share her extensive knowledge as a cosmetic nurse with those attending a Masterclass on Wednesday.

The industry masterclass at University of Strathclyde will look at 'lips through the ages' before Jackie then takes the topic to the Aesthetics Conference & Exhibition in London next month.

Jackie, who is a founding board member of the British Association of Cosmetic Nurses (BACN), said: "The day will be a real mix of teaching, presenting and live demonstrations, with plenty of tips and tricks thrown in.

"I will be at Strathclyde University all day, answering any questions practitioners may have and performing live injections.

"These presentations can be quite daunting, but I'm excited to get on stage and share my tricks of the trade with the other practitioners."

Known for her encyclopaedic knowledge and support of responsible facial treatments, Jackie was hand-picked last year by global pharmaceutical giant, Galderma, to sit on their expert panel of dermatologists and plastic surgeons.

Jackie continued : “Lip treatments have become increasingly popular and there are a lot of options out there for people to choose from.

“It is important that individuals pick their practitioner wisely and understand the process involved, otherwise results can be risky.

“At Dermal Clinic we use Galderma lip fillers which contain hyaluronic acid – a substance that is already naturally present in your body.

“This means that you are topping up with a natural product. We look to restore and enhance – not add.

“Ultimately it’s about creating the freshest version of you, because you should be able to look and feel naturally beautiful at any age.”
