

Edinburgh Castle high up the Instagram list

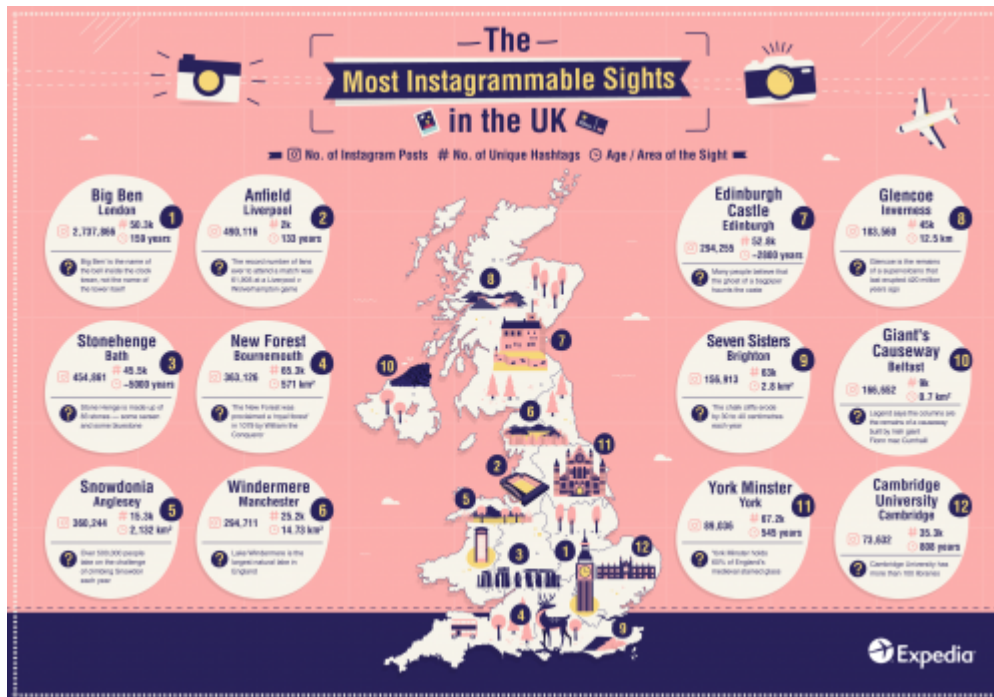

According to research conducted for Expedia Edinburgh Castle is one of the most Instagrammable Sights in the UK, coming in at number 7, just ahead of Glencoe.

The research totted up the number of Instagram posts and unique hashtags over the year to determine the results and found that Edinburgh Castle was photographed on the social media site 294,255 times last year.

Allegedly there is a report of a ghostly bagpiper up there too!
