Shakespeare wasn't a god, he was just a man.

Gillian English in She Wolf

His biases and prejudices are our biases and prejudices. A show about Shakespeare's propaganda concerning Queen Margaret of Anjou from 500 years ago to shine a light on where we are in the 21st century.

Daughter, princess, wife, queen, mother, warmonger, widow and crone... monster? Queen Margaret of Anjou – the original Cersei Lannister; model for Claire Underwood; a woman so cutthroat and cold she would make Lady Macbeth sh\*t her pants. Only none of that is true and the way we view women in positions of power hasn't changed much.

Margaret was a French Princess and an English Queen. Demonized in her time and mythologized through history, she has become more legend than lady. But who was Queen Margaret; where was the divide between personal and personal and political? 'She Wolf' is a comedic exploration of the infamous Queen as presented by Shakespeare in 4 monologues that laid the foundation for a mythical monster.
