

STEM family fun day in Leith tomorrow

Science and technology community roadshow at Leith Academy

A day of free family friendly activities will take place in Leith on Saturday 22 September 2018 as part of a programme focused on igniting interest in Science, Technology, Engineering and Maths (STEM).

The Raising Aspirations in Science Education (RAiSE) programme aims to encourage young people into STEM careers, through inspiring STEM learning for pupils, teachers and families.

The Leith Family Fun Day is a collaboration between RAiSE, The City of Edinburgh Council and The University of Edinburgh with involvement from other commercial and educational science partners.

Craigentinny, Hermitage Park, Leith and Lorne primaries, associated local nurseries and Early Years Centres and Leith Academy extend an invitation to the Leith Family Fun Day to all their families and community members.
