

Orla Kiely exhibition at Dovecot Gallery

Designer **Orla Kiely** is celebrated for her plant based patterns that pack a powerful graphic punch on everyday life.

Her flat graphic style and choice of colour palette have chimed with recent nostalgia for vintage style and interiors, and a new exhibition at Dovecot Gallery explores why the rhythms and repeats of her designs have such wide and enduring appeal.

With unique access to the company archives, the exhibition offers a privileged insight into the designer's world. Revisiting the work of other twentieth century luminaries in pattern design, this exhibition explores the story of pattern and how some designs can come to epitomise the style of their time.

The exhibition opens on 7 February 2019.
