

Penguins meet their Lego models

Edinburgh Zoo's rockhopper penguins were introduced to one of their BRICKLIVE Ocean counterparts this week, each made from 3,200 LEGO® bricks.

The penguin was one of the first models to arrive for the Zoo's upcoming world-exclusive BRICKLIVE Ocean display which will run from 6 July until 17 September.

Over 30 life-sized models made from more than one million LEGO® bricks will form an interactive trail around the Zoo including a killer whale, a hammerhead shark, a giant squid and much more.
