

Keep Scotland Beautiful this summer

Environmental charity, Keep Scotland Beautiful, launches new online summer education programme.

Ten brand new interactive online learning courses will be available for young people across Scotland during the month of July.

These new online learning programmes have been developed to provide a fun and enjoyable way for young people to continue their environmental learning during the summer holidays.

The courses cover a range of topics and environmental activities which encourage young people and families to explore the world around them and to think how to protect and improve the places they love. Included are courses on Eco-Schools, heritage, food and the environment and climate change, as well as other environmental topics.

Each course consists of a combination of online learning and practical, fun activities, and all those who complete a course will be rewarded with a certificate of involvement.

Registration is now open for each course and the full list, more information and details about how to take part, can be found [here](#)

Daniel Barrie, Education and Learning Manager, said: "Following the huge demand for our online environmental education programme during lockdown from both educators and young people, we have developed a series of exciting and interactive courses for children to take part in during the

summer holidays.

“These courses will provide a fun and engaging way for young people and their families to explore some important environmental issues, such as climate change and sustainable food, and the work completed can contribute towards their school’s next Eco-Schools Green Flag award. We have something exciting available for all ages – from nursery through to S6.”

As well as the online summer courses, Keep Scotland Beautiful will also be providing environmental education support to educators once blended learning begins in August. This will build on the existing partnership with E-Sgoil and will include a range of online learning activities for pupils coupled with professional learning for staff.
