Coronavirus — Monday's figures

The number of cases of Covid-19 in Scotland were announced by Public Health Scotland today and are reported below. The number of cases in Lothian is once again the highest in Scotland.

Yet again the number of people who have received a first or second dose of vaccine since yesterday is low.

The next review point will be 19 July by which time three weeks will have elapsed from the point at which all over 50s should have been offered the vaccine. At that point the government hopes that all of Scotland can move to Level 0 and physical distancing can be reduced from two metres to one.

After that the next significant date is 9 August when the vast majority of over 40s will have a significant level of protection. At that time it might be possible to move beyond Level 0, but it will depend on the data at the time. But in any case the government will not advise an immediate return to full offices working from 9 August. All of these measures will take time to put back in place.

As at 20 June, 10,150 deaths have been registered in Scotland

where the novel coronavirus (COVID-19) was mentioned on the death certificate, according to statistics published by National Records of Scotland (NRS) today.

In the week 14 – 20 June, 13 deaths were registered that mentioned COVID-19 on the death certificate, an increase of six deaths from the previous week.

There were four deaths in Glasgow City, two deaths in Perth and Kinross and one death in each of Dundee City, Falkirk, Highland, Midlothian, South Ayrshire, West Dunbartonshire, and West Lothian.

The number of deaths from all causes registered in Scotland in this week was 1,046, 46, or 5%, more than the five year average.

Pete Whitehouse, Director of Statistical Services, said: "The latest figures show that last week there were 13 deaths where COVID-19 was mentioned on the death certificate.

"Three deaths were aged under 65, two were aged 65-74, and eight were over 75. Five were female and eight were male.

"Ten deaths occurred in hospitals, one occurred in a care home, and two deaths were at home or in a non-institutional setting."

Deaths from respiratory diseases and dementia/Alzheimer's were below average, although there were more deaths from circulatory causes, cancer, and other causes compared to the five year average.

Date	Newly reported cases of Covid-19	Cases in Lothian	New tests	Test positivity rate (bold denotes days under 3.0% and the highest in recent weeks)	Newly reported deaths	Number of deaths according to daily measurement	Patients in ICU with confirmed Covid-19	Patients in hospital with confirmed Covid-19 (under 500 is in bold)	Total number of positive cases since beginning of pandemic	Number of first dose vaccinations administered	Number of daily vaccinations recorded for previous day with highest daily figure in bold (includes 1st and 2nd doses) Above 30,000 in bold	Number of people who have received their second dose of vaccine
