

Coronavirus – Saturday's figures

The number of cases of Covid-19 in Scotland were announced by Public Health Scotland today and are reported below.

There appears to be a higher number of cases today but some of this is due to an ongoing delay in the lab processing of specimen in the Glasgow Lighthouse lab, as there was yesterday. This may mean that a lower number of tests and cases reported during the previous 48 hours.

An announcement by the First Minister, Nicola Sturgeon, on Tuesday means that Edinburgh remains in Level 2 for now in view of rising case numbers over recent weeks.

As at 6 June, 10,130 deaths have been registered in Scotland where Covid-19 was mentioned on the death certificate, according to statistics published by National Records of Scotland (NRS) on Wednesday.

In the week 31 May – 6 June, eight deaths were registered that mentioned COVID-19 on the death certificate, the same number of deaths as the previous week.

There were three deaths in South Ayrshire and two in both Glasgow City and North Lanarkshire. The Scottish Borders recorded one death.

The number of deaths from all causes registered in Scotland in this week was 1,051, 3% more than the five year average.

Pete Whitehouse, Director of Statistical Services, said: “The latest figures show that last week there were eight deaths where COVID-19 was mentioned on the death certificate.

“One death was aged under 65, two were aged 65-74, and five were over 75.

“Seven deaths occurred in hospitals, and one occurred in a care home.”

Date	Newly reported cases of Covid-19	Cases in Lothian	New tests	Test positivity rate (bold denotes days under 3.0% and the highest in recent weeks)	Newly reported deaths	Number of deaths according to daily measurement	Patients in ICU with confirmed Covid-19	Patients in hospital with confirmed Covid-19 (under 500 is in bold)	Total number of positive cases since beginning of pandemic	Number of first dose vaccinations administered	Number of daily vaccinations recorded for previous day with highest daily figure in bold (includes 1st and 2nd doses) Above 30,000 in bold	Number of people who have received their second dose of vaccine
