

# Online Gambling Trends – A Look into The Future

The world of online gambling is getting bigger as more people join online casinos and betting sites. Of course, this growing supply and demand chain is driving innovation and development in this area. The latest software products have had a huge impact on the way we play online games. They offered a number of completely new features and improved the gameplay quality. While some of the new solutions enhance the experience by optimizing graphics or storage, others expand the opportunities through the gambling availability and more safety.

## **Extreme demand for live dealer games**

Land based casinos have always been the most attractive part of gambling world, with their special atmosphere, lighting, sounds, glamor and communication with people. And online gambling operators understand that in order to attract players, they need to provide a real experience comparable to a real gambling hall.

In recent years, with the introduction of broadband access and more powerful processors, the concept of live dealers has become especially popular. While playing in [LiveCasino](#), you can see a real table for playing roulette, blackjack or baccarat, as well as a real person – a dealer.

Physically, all this is located in a specially equipped studio. Cameras and sensors track the dealer's movements, as well as cards, the roulette ball, and thus the player watches what is happening and can react in real time. There is also an opportunity for communication between the player and the dealer. Therefore, live online casino players can experience

the full range of positive emotions from the social interaction that attracts in a real casino.

This format is quite expensive for online operators, so you can only play with live dealers on some serious online resources such as Shangri La. The site contains the latest releases, from classic live roulette and blackjack to vibrant show games such as Monopoly.

### **VR technologies bring the user inside the game**

The next major breakthrough in the gambling industry may be virtual reality games. Moreover, online casinos have all the prerequisites to become one of the pioneers in virtual reality, because the largest developers (NetEnt and Microgaming) are working hard on realistic VR games. This technology allows you to become part of the virtual space. The first prototypes were cumbersome and the graphics left a lot to be desired. But already now, modern virtual reality helmets do not have a ton of wires, are compact enough and affordable for many. Some casino games have already been created so that players can use virtual headsets to play them. On the Shangri La website, users get the opportunity to fully immerse in the gameplay in the innovative release of Gonzo's Treasure Hunt from Evolution Gaming.

### **Holographic technology – a completely new stage in the gaming**

At the moment, holograms in gambling have already become popular. Despite the fact that such technologies are too revolutionary for the average user, thanks to the wow effect, the player will want to try this game. After all, we get a sense of presence and that everything is really happening.

In Las Vegas, it is planned to create a new generation of gambling halls. These will be experimental casinos with holographic games, where bets and slots playing are to be done on a holographic display using gestures. Moreover, everything will be managed in such a way that the player can share what

he saw immediately on social networks. Thus, since the technology is beginning to be applied in real casinos, you can be sure that soon it will become commonplace in online gambling as well.

### **Smartwatch betting is now a reality**

In the past few years, people have been using their mobile phones and tablets to connect to online casinos. Now smartwatches will become a more convenient and affordable option. According to statistics, the global smartwatch industry will reach nearly \$ 33 billion by the end of 2021, and gambling will be a part of this huge trend. Modern smartwatches have quality screens and powerful processors, and there is no reason why you can't take advantage of this and play casino from your wrist. Moreover, already now you can run many games directly on your smartwatch without the need for a smartphone.

### **The always relevant trend**

Whether it's an online casino or a real one, the operator's goal is to always give customers what they want. In addition to providing a high-level service, incentive programs and bonuses, the main focus is to offer top-end games. The current trend is to combine the best of online gambling interactive systems and technologies with the traditional charm of high-end land-based casinos. And the Shangri La web platform, like no other Internet resource, is able to offer its users the best. The brand has over 30 years of experience in operating and managing casinos around the world. And their official website is an excellent confirmation of this. Try it and you will be amazed!
