

Celebrate Easter weekend at the Science Festival

Celebrate Easter at the Edinburgh Science Festival this weekend.

Visit the Festival's premier family area at [City Arts Centre](#) – with its five floors of hands-on science workshops and activities for children aged between 3 and 12.

Families can explore the chemistry behind producing your own slime in *Splat-tastic*, delve into the world of motion in *Speedy Sails*, uncover the mysteries of dinosaurs which roamed the Earth millions of years ago in *Dig Up a Dinosaur* or perform a surgery using real-life equipment in *E.R. Surgery*.

The photos below feature Dorothy (4 years old), James (1.5 years old), Kofi (1.5 years old) getting eggspexperimental with *Imagination Playground*, one of the City Art Centre activities.
