Early Origins of Cigars

Cigars have a storied past that traces back centuries. They originated with indigenous people, and their popularity soared with the arrival of Christopher Columbus in the New World.

Cigars were not merely tobacco; they were craftsmanship and culture rolled into one.

The Need for Humidification

As cigars spread to different corners of the world, they encountered diverse climates that presented challenges for their preservation and aging. It became clear that humidity control was essential to maintain the quality of cigars, thus birthing the concept of the humidor. Otherwise, if you didn't store cigars correctly, they'd end up losing their flavor, drying up or even growing mold.

The Birth of the Cigar Humidor

The invention of the cigar humidor was a game-changer. Its early forms were rudimentary, but they served a critical purpose. Innovations like the use of Spanish cedar and tight-sealing lids came about to maintain the ideal humidity levels for cigars. These early designs laid the foundation for the cigar storage solutions we know today.

Therefore, know that humidors are all about preserving cigars in their best form. They create the perfect environment, which is around 65 to 75 per cent humidity. To view a [humidor](#), head to Northwoods Humidors. There are various designs that are constructed for an ideal cigar environment. It's one of the first things you should invest in if you want to have a cigar collection.

Cigar Culture in Different Eras

Cigar culture is a living history. It's been interwoven with the social, political, and cultural fabric of different eras. From the smoke-filled rooms of the [19th century gentlemen's clubs](#) to the cigar-chomping icons of the 20th century, cigars have been more than a pastime; they've been a statement.

Iconic Humidor Creations

Throughout history, legendary figures have commissioned exquisite humidors. Winston Churchill's iconic humidor, a gift from President Franklin D. Roosevelt, is a symbol of their camaraderie during World War II. These humidors are not just containers; they're works of art and pieces of history.

Sir Winston Churchill had a leather travel humidor, which became famous. In particular, it was custom-made by Asprey. In many ways, it became iconic, and it was a symbol of him being a cigar aficionado. After his death, items like this were auctioned for a lot of money.

Humidors as Collectible Artifacts

In the contemporary world, antique and vintage humidors have become sought-after collector's items. They represent not just a functional purpose but also a piece of the past. Collectors appreciate the craftsmanship and artistry that went into these wooden boxes. They also love the fact that they have been used and loved over the years. It's like a tradition to go on and use them.

The Modern Cigar Humidor

The world of cigar humidors continues to evolve. Modern humidors come equipped with humidification systems and even smart technology to ensure that your cigars are stored in optimal conditions. The commitment to preserving the essence of cigar smoking remains unshaken. Of course, there are still traditional humidors that you can control and have a say over your cigar preservation. But, there are also contemporary alternatives that will do a lot of the work for you.

For example, there are now electric humidors. These are fantastic for housing a cigar collection, with humidity control all done for you. This is done with the use of fans and a digital hygrometer. They're available in several sizes, allowing you to select the right one for your collection and needs. What's more, they can have a modern design that

includes a glass front, allowing you to admire your cigars.

Conclusion

Cigar humidors are more than containers; they're time capsules that link us to the rich history of cigar culture. Their journey, from the earliest days of cigar smoking to the modern age, is a testament to the enduring legacy of cigars. So, the next time you open your humidor, remember that you're participating in a tradition that spans centuries. Plus, you're precisely preserving your cigars so that they're wonderful the next time you want to smoke one.
