

Edinburgh Festival of Cycling – feature documentary at the Cameo on Sunday evening

The Edinburgh Festival of Cycling will show Chasing the Sun a new film from BAFTA winning director, Michael B Clifford on Sunday evening at the Cameo.

In 1973 a professor in a little known American university set out to discover the most energy efficient creature on earth: turns out, it's a human being on a bicycle! The experiment has since entered into legend and is now more relevant than ever before. We explore extraordinary personal stories of ordinary cyclists chasing the sun, revealing the power of the humble bicycle to transform lives and help save the planet.

This film features contributions from broadcaster and ITV's voice of the Tour de France [Ned Boulting](#), author and blogger [Jools Walker](#), Turner Prize-winning artist Sir Richard Long and 4x Mountain Bike World Champion [Tracy Moseley](#).

CHASING THE SUN

one pedal stroke at a time

*"Inspiring and joyful,
a love letter to the humble
bicycle and all who ride one."*
