

# Unleash the Power of Voice Changer in CapCut Desktop Video Editor

Do you know how powerful is the impact of voice in your videos? The voiceover in a video can either make it go viral by catching everyone's attention or fail badly with zero engagement. However, the most common mistake many people make is that they ignore to work on a video's audio. As a result, the video fails to bring the desired results upon sharing. Therefore, CapCut Desktop Video Editor, a full-featured [video editing software](#), brings a professional voice changer tool for you!

## Why Do You Need A Voice Changer?

You need a voice changer for your video for the following reasons.

- It can change a poor and lifeless voice into an interactive voice.
- A voice changer can effectively enhance a voice's pitch and tone.
- It makes your voice more playful and engaging.
- You can use it for privacy, security, or masking your voice.
- You can use it to create fun videos or any professional video.
