

# **Hibs launch brand-new official Club App across both Apple iOS and Android**

**Hibs have launched a brand-new official Hibernian FC App across both Apple iOS and Android.**

The new app has been developed alongside the recently launched Club website, with the same functionality available across both desktop and mobile allowing for greater usability and access.

Through the Hibs App, supporters will be able to stay up to date with all Club news, videos, fixtures and more.

It'll also enhance supporters' matchday experience through the use of the Opta integrated match centre.

Fans can follow the action with text commentary, match stats, line-ups, live scores and post-match coverage too.

They can also set up notifications on goals, subs, and much more, as well as alerts on topics like news and ticketing so that they don't miss out any of the latest info.

There are also links to access the e-ticketing website and the Club Store.

A special competition is running right now, which is exclusive for supporters who download the app.

Hibernian FC's Head of Communications, Adam Tomlinson, commented: "This is another big step forward for the Club from

both a digital and communications standpoint.

“The Hibs App will provide supporters with greater access to match updates, club news, videos and much more. We wanted to create a platform where fans can access all club content as easily as possible.

“I’d like to thank Urban Zoo for their support, once again, during the build process of the app. We will continue to work with them to improve our digital products, so the Hibs App can become an all-stop shop for Hibs fans.”

Available immediately, the App can be download on the Apple Store and is also available for Android.

Access can be gained via the club website.
