Firework Control Zones will be in place from 1 to 10 November

Following disturbances in certain areas of the city last year and unruly behaviour, with attacks on emergency services, the council has taken action.

Councillors agreed that this year there will be Firework Control Zones (FCZ) in these areas:

- Balerno
- Calton Hill
- Niddrie
- Seafield.

The Firework Control Zones will be for a set period between 1 November to 10 November 2024 **only**.

You can [download the decision report](#) which is being published as required by Section 29 Fireworks and Pyrotechnic Articles

(Scotland) Act 2022.

When the decision was made in August, Culture and Communities Convener, Val Walker, said: “The Culture and Communities Committee endorsed the recommended actions, which allows us to implement the Firework Control Zones in the four areas from 1 – 10 November, following the 60-day lay period.

“This is just the first year, and will provide us with tangible evidence of its effectiveness and help guide implementation in years to come, along with extensive community consultation in 2025.

“Community safety, the protection of our emergency services personnel and animal welfare are among our top priorities when it comes to this decision.

“Bonfire Night and broader fireworks use in the city can be an opportunity for communities to come together to celebrate and spend time together, and we hope that these zones will allow the community to celebrate safely.

“The Fireworks and Pyrotechnic Articles (Scotland) Act 2022 gives councils power to introduce Firework Control Zones (FCZ). We will use FCZs along with other measures to support the safe use of fireworks.

Currently the council tackle issues involving fireworks by

- raising awareness within local communities
- by carrying out effective early intervention and prevention with families
 - engaging with young people in schools, through a local partnership approach with Scottish Fire and Rescue Service, and Police Scotland.
 - engaging with young people using diversionary activities
 - working with Police Scotland who carry out enforcement activities

The police may also use Dispersal Zones to help prevent anti-

social behaviour in November. This means police officers can order groups of two people or more to go home if police have reasonable grounds to believe they are causing alarm or distress to the public. Anyone who does not live in the area can also be ordered to go home and police can ban them from returning for 24 hours. Last year twelve dispersal zones were in effect in Edinburgh for three days.

Incident on cycle path

A scary incident on the cycle path in North Edinburgh on Sunday has led to the council saying they will review the exits and will possibly install bollards where necessary. A blue BMW 5 series was driven at speed along the path hitting a dog and causing it serious injury.

The police are still looking for the car and its driver.
