Lucky Clover

The fruit-themed slot machine is one of the oldest developments of the brand, and you can play this slot through [Memo Casino](#). Users are waiting for 5 active lines and five reels. In one spin you can glory up to 15 images. These are coins, plums, peaches, sevens, and bells, as well as a clover. It is this symbol that becomes the key symbol. The wild symbol

in the form of clover falls out only on the middle reel. When this card is involved in a prize combination, the player can count on increased winnings.

The Golden Duck

This game was released by the company before its debut on the Asian evaluation. The slot instantly became a hit. Gamblers will be able to choose up to 25 paylines. The mechanics are based on five columns. In the bonus set can be found 3 scatter symbols. These symbols, when appearing on the field, open a tour with free spins. During these free spins, you can catch a wild symbol. And the card will expand to neighbouring cells and thus give one round of several payments at once. If the user is lucky, the rate will be increased by 2000 times.

Bavarian Forest

The plot of the slot machine is devoted to animals and wild forests. The player acts as a kind of hunter. The client of the online casino will have to go on the trail of foxes, bears, deer and other wild animals. The key card is a bear. If you catch the king of the forest, you can swap other pictures for expensive ones. The image of the hunter also has prized features. It is a scatter that opens a tour of 15 paid scrolls.

Pot O'Luck

The online casino customer returns to the theme of fruit models. Stars, bells and fruits will form winning combinations of two and three identical chips. However, there is another secret card in this emulator. A pot of coins can only fall out on the second and fourth columns. The trick is that the apparatus has 100 active lines, and the pot gives auxiliary multipliers.

Aztec Empress

CT Interactive could not avoid the historical theme. It is about the treasures of the Aztecs, hidden in an abandoned pyramid. The bet is played on 15 lines. Symbols appear on 5 reels and include prize images in the form of wilds and scatters. The secret is that the maximum multiplier of the apparatus is a record and is x9000.

The rating of CT Interactive games can be continued with new developments of the brand. The operator is actively exploring new types of mechanics. This applies to the purchase of bonuses and the addition of wilds, which can stick in their place or occupy the entire drum. Interestingly, even the brand's slot machines released in the early 2010s are still in demand.
